InveStar - SCF Reviewer Brief

SCF Build Award #43 | Integration Track (Large) | $141,325 | 16 Weeks

Architecture Overview | Data Flows | MoneyGram Proof | Security | Soroban | Milestones | Traction

$28B+ Corridor/yr	993 Beta wallets	~1% All-in cost	3-5s Stellar	$141K SCF #43

> InveStar replaces SWIFT with Stellar USDC rails + adds a unique primitive: every remittance auto-routes a user-defined % into Dhaka Stock Exchange stocks via InveStar's live B2B DSE OMS (direct brokerage connections, live in beta). 993 beta-user wallets on-chain. Confirmed MoneyGram partner (Chain: Stellar, Asset: USDC, Withdraw + Deposit ACTIVE). No competitor (Wise, TapTap, Remitly) combines Stellar settlement + investing. Soroban smart contracts (T3) will automate this on-chain. Recipients see BDT - not crypto.

Mod.	Service	Stellar Integration	Status
A	stellar-ramp-service	SEP-10/24 | HSM JIT signing | USDC SAC	Live - 993 wallets | 1,000+ ops
B	moneygram-transfer-service	USDC -> MG Transfer API | bKash/bank BDT	Sandbox tested | MG partner confirmed
C	treasury-conversion-service	USDC->USD | MoneyGram FX (BD Bank compliance)	Architecture complete
D	remit-to-invest-connector	Horizon SSE -> InveStar B2B DSE OMS (live, direct brokerage) | Soroban automation T3	DSE OMS live | Soroban T3

System Context & Container Architecture

Each module maps to a funded milestone: Mod A=M1.1-M1.2 | Mod B=M2.2 | Mod C=M2.1 | Mod D=M3.2-M3.3. Azure Key Vault HSM FIPS 140-2 L3: private keys never leave the secure boundary.

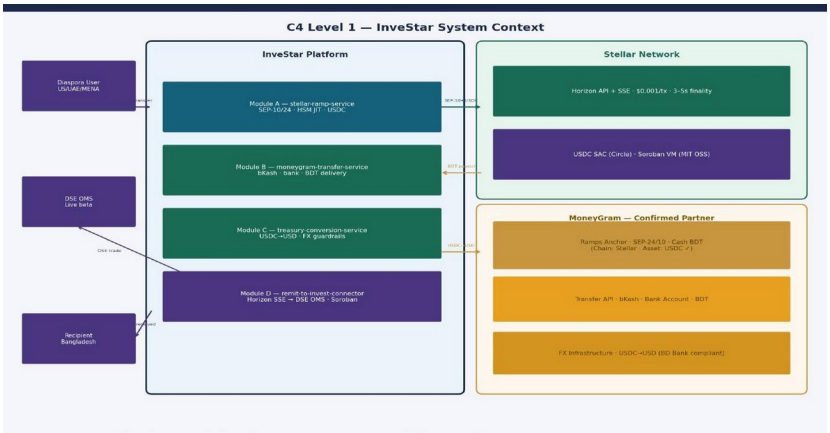

Figure 1: C4 Level 1 - US/UAE/MENA sender -> Stellar USDC -> MoneyGram (confirmed partner, Chain: Stellar, Asset: USDC) -> BDT recipient

Figure 2: C4 Level 2 - 5 microservices | Azure HSM | Stellar rail | MoneyGram confirmed partner

Data Flows - Three Delivery Tracks

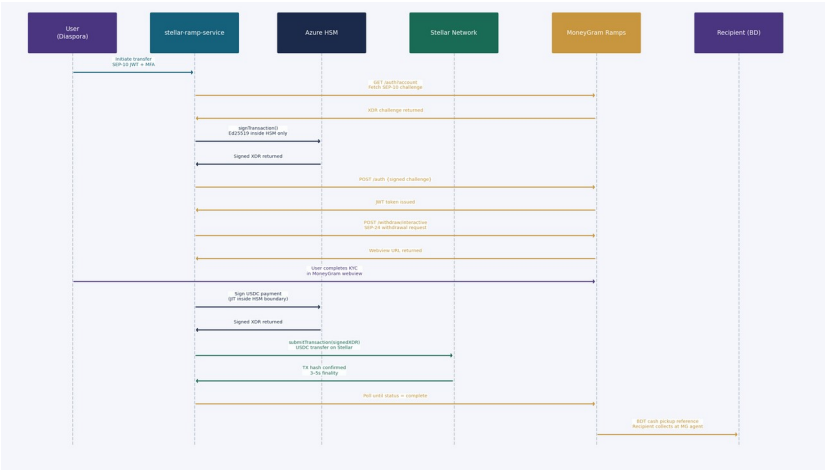

Figure 3: Track 1 SEP-24 Cash Pickup (T1 MVP | M1.2) - User -> SEP-10 auth -> USDC on Stellar (3-5s) -> MoneyGram anchor -> BDT cash pickup

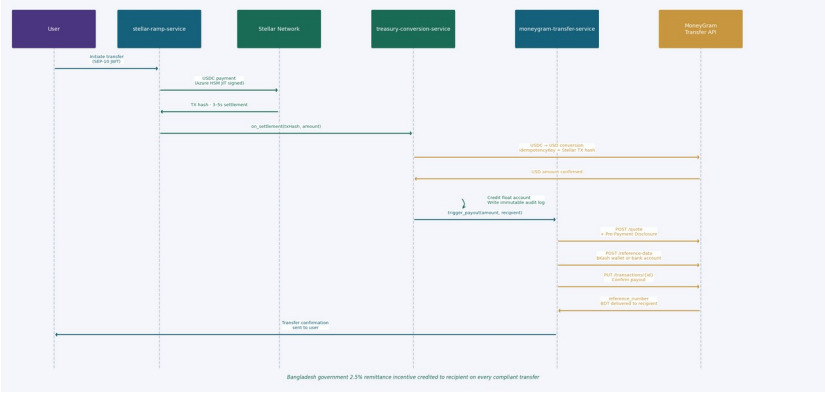

Figure 4: Track 2 bKash/Bank (T2 | M2.2) - USDC settles Stellar -> treasury converts -> MoneyGram Transfer API -> BDT direct to bKash or bank

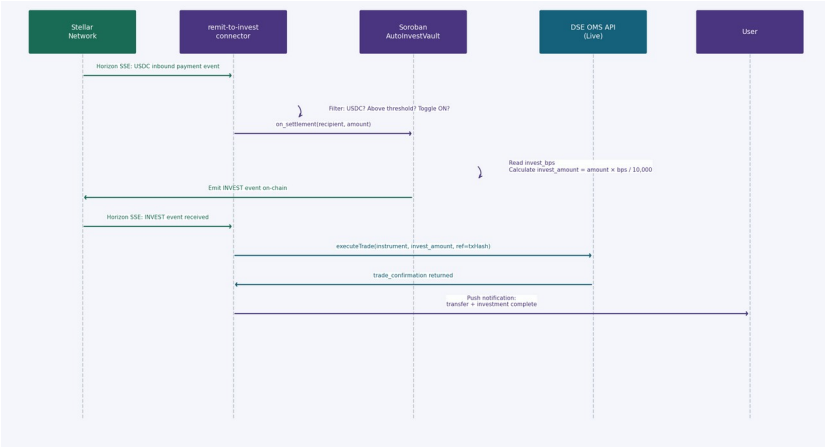

Figure 5: Remit-to-Invest — Horizon SSE -> InveStar B2B DSE OMS (live) -> DSE trade. Soroban AutoInvestVault (T3) automates this on-chain. Unique: no competitor combines Stellar settlement + DSE investing.

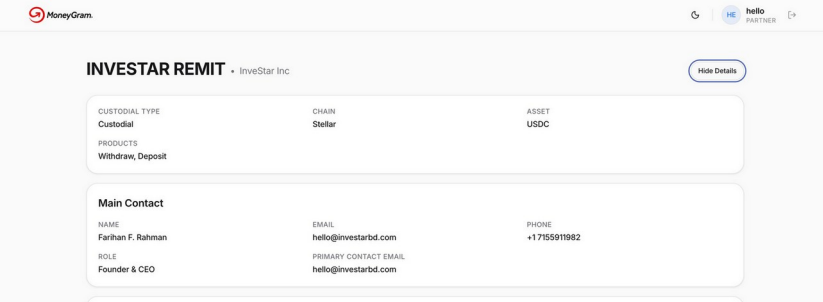
MoneyGram Confirmed Partnership & Live Traction

> NOT a letter of intent - InveStar is a registered entity in MoneyGrams partner management system with Stellar USDC Withdraw and Deposit products ACTIVE. Directly confirms M1.2, M2.2, and Module C FX infrastructure.



MoneyGram Partner Portal - INVESTAR REMIT | Chain: Stellar | Asset: USDC | Products: Withdraw, Deposit | Status: Active registered partner

Traction Metric	Verified Data
Testnet operations	1,000+ | snapshot 2026-04-18 | all verifiable on stellar.expert
Beta-user wallets on-chain	993 Stellar accounts created via stellar-ramp-service
Mainnet accounts	2 live | beta-limited | cutover Q2 2026 per SCF milestone plan
MoneyGram partner	Chain: Stellar | Asset: USDC | Withdraw, Deposit - ACTIVE confirmed
DSE OMS integration	Live in beta | only startup with direct Dhaka Stock Exchange integration
Capabilities shipped	9 live: Stellar SDK | wallets | DEX swaps | fiat ramps | remittance | mobile | DSE OMS | dashboard
Live URLs	app.investarbd.com | app.investarbd.com/traction | oms-investar.dev.sandbox3000.com

Security | Soroban | Milestones | Team

Security - 5 Layers

Layer	Control	Detail
Network	TLS 1.3 + rate limiting	Azure APIM per-user rate limits | anomaly detection
Auth	SEP-10 JWT + MFA	Challenge-response with MG Ramps anchor | TOTP/OTP
Key Custody	Azure Key Vault HSM	FIPS 140-2 L3 | Ed25519 non-exportable | JIT sign inside HSM (AES-256-GCM staging)
Application	Check-Effect-Interaction	Pending state before external call | Stellar TX hash as idempotency key
Compliance	FX guardrail + AML/KYC	SEP-12 with MG anchor | Append-only audit log -> Stellar TX hash

Soroban Smart Contract Roadmap (T3 Planned)

Phase	Round	Key Deliverable
Phase 1	This round (T3 M3.3)	AutoInvestVault: replaces the live off-chain DSE OMS bridge with on-chain automation | on_settlement() -> INVEST event -> Horizon SSE | MIT OSS on GitHub
Phase 2	Next SCF round	InvestRouter: cross-contract calls | no off-chain bridge | Principal Invariant | VaultFactory isolated vaults
Phase 3	SCF round +2	YieldVault: DRR model | APY_eff = APY_DeFi x (1-R) | utility-backed Stellar DeFi TVL

Milestones & Budget

Tranche	Cost	Weeks	Key Deliverables
T1 MVP (3 milestones)	$43,600	1-6	Stellar wallet + SEP-10/24 MoneyGram Ramps (confirmed partner)
T2 Testnet (5 milestones)	$45,225	5-11	Treasury + MG Transfer API + SEP-12 KYC + 50-user beta
T3 Mainnet (7 milestones)	$52,500	10-16	Mainnet + remit-to-invest + Soroban OSS + mobile + SDK
TOTAL	$141,325	<=16	$8,675 under $150K cap | payments: 10%/20%/30%/40%

Team

Name	Role	Credentials
Farihan Rahman	CEO since 2023	EIR Draper University | Nasdaq Milestone Makers Fall 2025 (first BD EdTech/FinTech) | O-1 + EB-2 NIW

Shafkat Alam	CTO since mid-2023	University of Toronto CS | Leads all Stellar architecture + production code + team of 8 engineers
Dipro Chowdhury	COO since mid-2023	Masters MEng University of Bristol | 10+ years capital markets investor | operations + legal
